Lynk & Co is redefining sustainable mobility with the Lynk & Co 08, a groundbreaking plug-in hybrid SUV that combines an impressive 200 km all-electric range (WLTP) with DC fast-charging capability. This innovation blurs the boundaries between conventional plug-in hybrids and fully electric vehicles, setting a new benchmark for the industry.

## **Revolutionary Electric Performance**

At the core of the Lynk & Co 08 is an advanced 39.5 kWh battery, designed to support almost entirely electric driving—whether it's for daily commutes or longer journeys. Unlike typical plug-in hybrids with limited electric ranges, this SUV offers a more sustainable and cost-efficient way to drive.

One of its standout features is its DC fast-charging, which allows the battery to recharge from 10% to 80% in just 33 minutes—saving time and enhancing convenience during long trips.

With the combined power of its electric motor and internal combustion engine, the Lynk & Co 08 delivers a remarkable total range of over 1,100 km, offering unmatched flexibility for drivers.

## **A Step Towards Greener Driving**

With the 08, Lynk & Co demonstrates its dedication to bridging the gap between electric vehicle adoption and hybrid practicality. By offering an extended electric range, this SUV provides an attractive option for drivers hesitant to fully switch to EVs but still eager to reduce their carbon footprint.

The Lynk & Co 08 challenges the perception of plug-in hybrids as merely transitional vehicles. With a strong focus on extended electric range, fast-charging technology, and exceptional overall range, the company is taking a definitive step toward a greener and more efficient future for mobility.
